HI-TECH A 2 board, 420 x 594 mm.

Acrylic glass boards are the perfect way to present your print.

It is a very modern form and modern design.

Acrylic glass 4 mm x 2 layers + four steel spacers.

We emphasize that our spacers are made of acid-resistant steel (not made of plastic, corian, metal / shell, etc.)

Easy and quick assembly:

- 1 - Use a spirit level to mark four points with a marker pen through the holes cut in the plexiglass.
- 2 - drill holes, insert pegs into them and screw the previously disassembled distance sleeves to the facade.
- 3 - put the poster between two layers of acrylic glass and screw it to the right side of the spacer.
