Pylons, Totems are built according to the entrusted projects made by an architect or constructor.

We can of course produce a pylon according to your individual idea.

Pylons are usually up to 600 cm high.

The most commonly used materials are steel - the main load-bearing structure + aluminum system profiles + aluminum on the face or plexiglass with graphics.

Individual project according to your guidelines (3 projects to choose from): EUR 25 + VAT 23%
