Pylon with a list of companies, Directional pylon, Advertising pylon, Entrance welder, Advertising board, EU board, Totem,

Parking boards: boards defining the parking zones, boards for the parking lot with regulations.

Medea Alu pylons are manufactured on the basis of a system profile anodized in silver, one-sided or two-sided.

Advertising pylons in this technique are distinguished by a modern style, good quality and, above all, low price in relation to

to products in this group.

Construction of the Pylon:

- system side profiles silver anodized.

- face: system panel panels - brushed aluminum.

- Graphics digitally printed directly onto aluminum.

We can attach various types of snap frames for exchangeable information, containers, etc. etc. to the face.

- possible external illumination with LED halogen on the arm.

The product is packed in one mobile package with simple assembly instructions.

1 - Your assembly: Easy and quick assembly in the range included, according to the attached instructions.

2 - Our assembly: We also provide assembly throughout the country .... please specify the city ... we will quickly get a quote.

Mobile foundation:

The pylon can also be mounted on the external foundation without interfering with the ground.

The price in the box is for a one-sided pylon.
