Pylon with a list of companies, Directional pylon, Advertising pylon, Entrance welder, Advertising board, EU board, Totem,

Park signs: Boards defining parking zones, Boards for parking with regulations.

Medea Alu pylons are manufactured on the basis of a system profile anodized in silver. **one-sided or two-sided.**

Advertising pylons in this technique are distinguished by a modern style, good quality and, above all, low price in relation to

to products in this group.

Pylon construction:

- system side profiles silver anodized.
- face: system panel panels - brushed aluminum.
- Graphics digitally printed directly on aluminum.

On the face we can attach various types of snap frames for exchangeable information, containers, etc. etc.

- external halogen LED illumination on the arm is possible.

The product is packed in one mobile package with simple assembly instructions.

1 - **Your assembly** : Easy and quick assembly within the scope included in the included manual.

2 - **Our assembly** f: We also provide **assembly** throughout the country please specify the city ... **we will quickly get a quote** .

Mobile foundation:

The pylon can also be attached to the external foundation without disturbing the substrate.

The price in the box is for a one-sided pylon.
