Panel boards with rotules on rails.

The boards in this form have a very aesthetic appearance and allow us to install them quickly and easily, without making too much holes in the facade.

The steel profiles have 4 holes inside and allow you to hang the whole board like a picture on the wall.

The panels are digitally printed on the underside of the tile and sealed with sandblasted foil.

The panel measures 500 x 150 mm.

The price includes a printed advertising and information panel, decorative steel 2 spacers and a rear profile to hang the entire board with panels.

Later shipment of the panel itself (e.g. in the event of a tenant change) without distances and back profile = EUR 25 net.
